

WINTER READY? EARLY BIRD ORDER OF SNOW AND ICE MELTER

Winter is right around the corner, so don't get caught unprepared! Last year, many facilities struggled to source salt and ice melt once the snow started falling. Now's the time to stock up and stay ahead of the rush. Take advantage of our **early bird special** on our premium ice melt blend, formulated with corrosion inhibitors, anti-caking agents, and natural anti-penetrating compounds to protect surfaces while keeping your walkways and parking lots safe and ice-free all season long.

WHY CHOOSE ICE MELT OVER SALT FOR COMMERCIAL FACILITIES?

While rock salt can be an inexpensive option, ice melt offers superior performance and protection—especially for high-traffic commercial environments.

- ✓ **Faster Results:** Works quickly and at lower temperatures for safer walkways and parking lots.
- ✓ **Surface Protection:** Formulated with corrosion inhibitors to protect concrete, metal, and flooring.
- ✓ **Less Mess:** Anti-caking and anti-tracking agents reduce residue brought indoors.
- ✓ **Plant & Property Friendly:** Gentler on landscaping and building entrances than traditional salt.
- ✓ **Longer-Lasting Effect:** Stays active longer, reducing reapplication and labor costs.
- ✓ **Professional Grade:** Ideal for commercial and industrial properties where safety and performance matter most.

Specially combined to produce a synergistic chemical reaction, melting snow and ice quickly while reducing harm to vegetation or seasoned concrete. Effectively works down to -10 Fahrenheit. Reduces damage to trees, grass and shrubs. Blue color assures even distribution.
